INSTALLATION\***

*\*Offer valid on website after making \$150 refundable deposit and scheduling virtual consult.*

# Power Outages Can Happen Anytime

Your home is threatened by power outages, no matter where you live. In an increasingly technological world, we are using more power than ever, which means it's more critical to protect your home and life with a backup generator.

In recent years, power outages have become more prevalent throughout the United States. The majority of outages are weather related, while other causes include car accidents, utility failure, animals, and an overstimulated power grid.

## THE HIGH COST OF POWER OUTAGES

**\$10,000**

Frozen Pipes

**\$26,807**

Flooded Basement

**\$500-\$30,000**

Mold Removal

**\$110**

Alternate Shelter  
(Per Night)

**\$250**

Restock Refrigerator

# Don't Get Stuck in the Dark. Protect Your Home Today.

Give your home the power it needs with the perfect generator from Sila Generator Solutions. Whether you are looking to power your entire home or just the essentials, an automatic home generator can protect your home and life. Not to mention, it can save your family thousands of dollars in the long run.

Once you have taken the [Sila Generator Quiz](#), you will have a better idea of the type of power needs your home has. From there, Sila can help you find the perfect Generac Generator for whole-home or essential protection.

Here's How  
Backup  
Generators  
Work →

## 1 THE POWER GOES OUT

*For whatever reason, you find yourself without power. This is likely the result of a storm, electrical grid failure, or power line damage in your area. In any case, the electricity you depend on is suddenly gone without warning.*

## 2 YOUR SYSTEM DETECTS THE PROBLEM

*Every generator that we sell has a built-in system to detect the power outage. Generac's automatic home generators will then work to restore power to your home within seconds.*

## 3 YOUR GENERATOR TURNS ON

*Once your generator turns on, it will automatically supply power to your pre-selected circuits (essentials) or your entire house—even if you aren't home.*

## 4 HOME POWER PROTECTION

*Refrigerators stay running, lights stay on, electronics remain charged. The automatic transfer switch sends generator power to your home until utility power returns.*

## 5 AUTOMATICALLY TURNS OFF

*Your system will detect when utility power has returned to your home and will shut off automatically.*

## Schedule A Free Consultation Today!

We are committed to providing the most reliable backup power solutions to our customers. If you would like to lock in savings, or speak to a Sila expert, call us at (484) 799-1598 or visit [SilaGenerators.com](https://www.SilaGenerators.com)

# Power Solutions For Every Home

At Sila Generator Solutions, we are committed to providing the most reliable backup power solutions to our customers. Take the online Generator Quiz to find the perfect generator for your home's needs.

## WE MAKE BUYING A GENERATOR EASY

### Quiz

Start by answering a few questions about your home and power needs to determine the perfect generator for you.

### Assessment

Our Home Comfort Experts will confirm the details of your selection and present financing options that work for any budget.

### Installation

We prioritize your schedule, not ours. Pick the date, and we make power outages a thing of the past.

### Maintenance

Stay protected and keep your generator running smoothly with expert service and annual maintenance from our team of factory-trained technicians.

## What Do You Want To Power?

### Essentials

Generators with essential circuit power protection ensure your home's necessities will remain powered during an outage. The 16-Circuit Automatic Transfer Switch restores power for up to 16 critical circuits of your choice during an outage.

- **Power Options:** 10kW and 14kW (plus 100-amp 16-Circuit ATS)
- **Ideal For:** Homeowners who want to protect essential loads during an outage
- **See Model:** #7224

### Whole Home

Many homeowners want the peace of mind that comes with whole house coverage during a power outage. If you want superior backup power throughout your entire home, we offer a variety of powerful Generac generators.

- **Power Options:** 18kW-26kW (plus 200-amp transfer switch)
- **Ideal For:** Homeowners looking for superior whole-house power protection
- **See Model:** #7228, #7210, #7291

As solution providers, our team is trained to repair any part of your backup system, so you aren't left in the dark.*

### REPLACEMENT

- ✓ *Great service includes respecting your property and time. We'll leave your home cleaner than we found it, guaranteed.*

WE EMPLOY  
NATE-CERTIFIED  
TECHNICIANS

# Kind Words From Our Customers

Read what some of our satisfied customer have to say about Sila Generator Solutions:

*My experience with Sila has been very positive over the years. I purchased my generator and updated my air conditioning unit thru them. They perform all of the maintenance as well. The office staff is friendly and helpful and the servicemen are knowledgeable and are always on time. I have never had a problem scheduling either a routine check or an emergency repair.*

**JM (Google)**

*They gave me a good recommendation for a generator and never had an issue with the unit except for routine maintenance and the one recall from the generator company. I have been using them for many years for my generator. They are always very polite when I call with an issue. And if they cannot give me answer right away they do call back. The servicemen who came out to my house were very professional and cleaned up after themselves. I would recommend that you include them in any estimates before deciding. My dad always taught me to get three or four estimates before deciding on a job.*

**EP (Google)**

*Once again Sila came and did a great Job for me. Kris and his partner did extraordinary job. These guys always go above and beyond and do everything they can do. They care about you your home and your family. Thanks to Clay and Bryan too.*

**JJ (Google)**

*I have had great experiences with this company whenever I use them for heating, air conditioning, my electrical needs and now my whole house generator. Great job, from the excellent call takers to every technician who has come out. Thank you!*

**ED (Google)**

*Sila installed a generator for us. Great price, quality work, the nicest people!*

**AC (Google)**
